

MEP Data & Schedule Reference

LUA BIM LABS Starter - Track 6 Quick Reference | Track completion card - Day 47

Revit Schedule Types by Discipline		
Discipline	Schedule Type	Primary Purpose
HVAC	Mechanical Equipment Schedule	List AHUs, FCUs, VAV boxes with mark, level, system, flow
HVAC	Duct Schedule	Total duct length by size and system - quantity takeoff
Piping	Pipe Schedule	Total pipe length by size and material - procurement
Piping	Mechanical Equipment Schedule	Pumps, heat exchangers with capacity, flow, pressure
Electrical	Electrical Equipment Schedule	Panels, transformers with voltage, phase, load
Electrical	Cable Tray Schedule	Tray length by width and type
Plumbing	Plumbing Fixture Schedule	Fixtures with mark, type, water demand
Plumbing	Pipe Schedule	Domestic water and drainage pipe by size and material
Fire	Mechanical Equipment Schedule	Fire pumps, sprinkler heads - count and location
Fire	Pipe Schedule	Sprinkler main and branch pipe by size
All	Duct / Pipe Fitting Schedule	Fitting count by type - procurement and quantity check

Key Parameters by MEP Discipline	
HVAC Mark (unique equipment ID), Family/Type, Level, System Classification, System Name, Design Flow Rate, Air Volume (CFM/L/s), Filter Type	
Piping (Mechanical) Mark, Family/Type, Level, System Name, Pipe Size (DN/NPS), Material, Design Flow Rate, Operating Pressure, Insulation Specification	
Electrical Mark, Family/Type, Level, Voltage, Phase, Load Classification, Circuit Number, Panel Name, Load (kW/VA)	
Plumbing Mark, Family/Type, Level, System Type (Domestic Cold, Domestic Hot, Sanitary), Pipe Size, Slope (for drainage), Material	
Fire Protection Mark, Family/Type, Level, System Name (Wet/Dry), Pipe Size, Sprinkler Head Type, K-Factor, Coverage Area	

COBie Required Fields	
COBie (Construction Operations Building Information Exchange) is the standard data format for BIM-to-FM handover.	
COBie Sheet	Key Required Fields
Facility	Name, Description, ProjectName, SiteName, LinearUnits, AreaUnits
Floor	Name, Description, Elevation, Height
Space	Name, Description, FloorName, Area
Component	Name, Description, CreatedBy, TypeName, SpaceName

Type	Name, Description, Category, Manufacturer, ModelNumber, WarrantyDuration
Attribute	Name, Category, Value, Unit, CreatedBy

Data Export Checklist - FM Handover

- [v] All equipment has unique Mark values - no blanks or duplicates
- [v] Manufacturer and Model Number fields populated for all COBie-required equipment
- [v] System names follow the project BEP convention - no "Default" systems
- [v] Floor and space data linked to equipment in the schedule
- [v] IFC export completed and validated - check in Solibri or BIM Collab
- [v] COBie spreadsheet exported and reviewed for blank required fields
- [v] Warranty and maintenance data fields populated per FM requirements
- [v] Schedule CSV exported and cross-referenced against design specification quantities
- [v] File version and issue date recorded in the export log
